Foreword

This Group Code of Ethics (hereinafter also “Code”) is an official document of Carraro Spa, with the first version adopted by a resolution of the meeting of the Carraro Spa Board of Directors held on 29 March 2007 and subsequently updated and adopted also by each Carraro Group Company (hereinafter also “Carraro Group” as defined in point B).

The Code therefore sets out ethical duties and responsibilities in the conduct of corporate business and activities, to which each Person concerned, as defined below, must conform in the performance of their duties. Knowledge and observance of the Code by all who work for or have business relationships with Carraro Group, or with one or more Group companies, is therefore of fundamental importance, which is why the Code will be disseminated through suitable means (as provided for in point III, 2, 2.1a.)

The Code of Ethics is based on the national and international regulations, guidelines and main documentation on the subject of corporate social responsibility and corporate governance, human rights and the environment, such as, for example, the United Nations Universal Declaration of Human Rights, the International Covenant on Civil and Political Rights, the European Convention on Human Rights, and the International Labour Organisation (ILO) Declaration on Fundamental Principles and Rights at Work. The Code, which has also been updated in line with the internationally recognised best practices, furthermore incorporates the principles set out by the Group’s sustainability policies: the Anti-corruption Policy, the Human Rights Policy, the Environmental Policy, Health and Safety in the Carraro Group, and the Diversity Policy.

The Code of Ethics introduces and binds each Carraro Group Company (hereinafter also the “Company”) and all Recipients, if applicable, to the principles and rules of conduct for the reasonable prevention of the offences indicated in Legislative Decree No. 231 of 8 June 2001.

Introduction

A) Carraro Group Overview

The Carraro Group is a multinational global leader in the production of power transmission systems.

The Carraro Group’s development is a case history in business success that has implemented strategies hinged on diversification, innovation and internationalisation to become a multinational world leader in the power transmission systems business.

Carraro was founded in 1932 and initially focused on the production of agricultural seed drills in an inter-regional market. In the 1950s, the company entered the agricultural tractor market with the 1958 production of the first “Tre Cavallini” (Three Little Horses) branded tractor.

In the 1970s and 1980s, Carraro experienced a growth spurt with development of the core business activities. In 1973, the company extended further, developing the business of the ‘axles and drives’ division, specialising in the design and construction of axles and drives for agricultural tractors and earth-moving machines.

In the mid-1980s, supported by the development of core activities, Carraro began decentralising accessory production through the acquisition and incorporation of companies specialised in activities functional to the core business. The Carraro Group was thus formed.

The 1990s were a period of change for the Group, which was launching its internationalisation process with the creation of numerous sales branches in various countries around the world.

On 27 December 1995 the holding company Carraro Spa was listed on the Italian Stock Exchange.

In 1997 Carraro signed a joint venture agreement in India, with a 51% share, with a major Indian industrial group, Escorts Ltd. This resulted in the development of the project to create a production centre in the country. In 1998 Carraro started the construction of the Carraro India

Ltd plant in Pune, which officially began production in 1999. Over the years, the Group also signed further acquisition agreements leading to the establishment of new production plants in Poland, the United States, Argentina and Germany.

The extension of the industrial platform also continued, both in Italy and abroad, with the 2005 opening of the second Carraro production facility in India in Pune (Turbo Gears Ltd.), specialising in manufacturing gears and components, and the creation of Carraro Qingdao, the Group's first facility in China. Confirmation of the centrality of the Indian market came in 2006 when Carraro developed important extension projects; first with the acquisition of the entire capital of Carraro India, and subsequently, with the creation of a new research centre in Pune, Carraro Technologies India, devoted to the research and development of new products.

An important turn in Carraro's production activities then took the form of the acquisition (in May 2006) of the majority share (67%) in Elettronica Santerno, a company specialising in the design and production of systems for the power electronics, automation and energy conversion sectors.

On 17 October 2007 Qingdao saw the opening of the new Carraro China plant. The plant covers a total area of 23,000 square metres and manufactures drive systems for stationary applications (such as escalators), integrated drives for fork-lifts and material handling, axles for agricultural tractors, and earth-moving machines.

After the compression of the markets of 2009 and the revision phase of the global production platform were overcome, in May 2014 the new Carraro Brasil facility was opened, at Caxias do Sul, a Brazilian city situated in the State of Rio Grande do Sul close to some of the Group's main customers to strengthen Carraro's presence in the Brazilian market.

The three-year period from 2014 to 2017 marks a redesign of the medium and long-term strategy, with the decision to draw the Group's focus back to its core business: drive systems and agricultural tractors. The strategy was implemented also by withdrawing from the segments of minigears for light power tools (Minigears SpA), mining drives (O&K Antriebstechnik & Co.) and power electronics for photovoltaics (Elettronica Santerno SpA), at the same time as reinforcing the capital through a significant capital increase.

The Carraro Group's activities, coordinated by Carraro Spa in its role of strategic guidance and control, are divided into the following business areas:

› **Drivelines (axles, transmissions, components)**

Specialized in design, manufacturing and marketing of transmission systems mainly for agricultural and construction equipment, and also markets a wide range of gears for very diverse sectors, from the automotive industry to material handling, agricultural applications and construction equipment.

› **Vehicles (tractors)**

Focused in design and manufacturing of specialised tractors (for vineyards and orchards from 60 to 100 hp) for third-party brands as well as a specialised Carraro-brand range.

3.1. Relationships with Public Administration and with Authorities

Relations with the Public Administration must be characterised by maximum transparency, clarity, propriety, and respect of respective roles, and must be conducted in a manner that does not lead to partial, false, ambiguous or misleading interpretations on the part of any institutional party with whom any relations are maintained.

Contacts with both Italian and foreign Public Administrations are limited to those who are specifically and formally authorised by the Company to deal with or have contacts with such administrations, public officials, bodies, organisations and/or institutions.

Specifically, the promise or offer, either directly or indirectly, of money, gifts of any nature or other benefits to managers, officials or employees of the Public Administration or their relatives, whether Italian or of other countries, in order to influence the independence of judgement of such public officials or to induce them to secure undue advantages is prohibited.

Unlawful payments made directly by employees of the Company or through intermediaries in Italy or abroad are considered acts of corruption.

Employment of ex-employees of the Italian or foreign Public Administrations, or their relatives up to the second grade of kinship, who participate or have participated actively in business negotiations with, or endorsed applications made by the Company to the Italian or foreign Public Administration is also prohibited.

Other conduct which is not permitted during business negotiations with representatives of the Public Administration includes, purely by way of example, the promotion, in any manner,

of employment or commercial opportunities that could benefit public officials and/or public service representatives, the solicitation, obtainment or exchange of confidential information that could compromise the integrity and reputation of both parties, and in general any act that is intended to induce Italian or foreign public officials and/or public service representatives to undertake any action or omission in breach of the regulations of the organisation to which they belong.

It is prohibited to allocate subsidies or funding, even sums of modest value, obtained from the government or other public bodies for purposes other than those for which they granted.

Finally, the Company condemns any conduct intended to obtain any type of contribution, financing, concessional loan or other disbursement of the same type from the state or other public body by means of altered or falsified declarations and/or documents or through the omission of information, or more generally through artifices or deceptions, including by the use of a computer or data transmission system, which are intended to mislead the disbursing body.

3.2. Relationships with the Judicial Authority and Authorities with powers of inspection

The Company acts in accordance with the law and, within the limits of its own authority, does not obstruct the proper administration of justice.

During any type of access conducted by the Public Administration, employees involved must immediately notify their hierarchical superior, the department head or internal person that they report to, if they have not already been notified, of the presence on Company premises of members of the Public Administration, and must scrupulously abide by any instructions that the department head or internal person that they report to may give. In all cases, the department head or internal person that they report to shall manage relations with members of the Public Administration or persons engaged or delegated by them. The department head or internal supervisor must immediately notify the Supervisory Body of the inspection/access/assessment and of its outcome.

The Company requires employees to provide any person carrying out inspections or verifications on behalf of the Public Authority with the utmost cooperation and collaboration.

It is prohibited to destroy or alter registrations, minutes, accounts, and any other type of document, or to lie or make false declarations to the competent authorities.

No person may attempt to persuade others to provide false or misleading information to the competent authorities.

No person may undertake economic activities, confer professional positions, give or promise gifts, money, or other benefits to anyone carrying out verifications and inspections or to the competent judicial authorities. Those who, due to their employment, are subject, including in a personal capacity, to investigation, inspections, or writs of subpoena, and/or those who are notified of other judicial orders must inform their hierarchical superior or, failing this, their department head or internal supervisor. In all cases the department head or internal supervisor must inform the Supervisory Body of such occurrences.

Relations with the judicial authorities and judicial police, of any rank and degree, shall take place with the utmost transparency, fairness and assistance; in this regard, Persons concerned, particularly when involved in legal proceedings, shall refrain from adopting a conduct that is unforthcoming or omit information or that may result, even indirectly and/or involuntarily, in obstructing the work of legal bodies. Likewise, Persons concerned shall refrain from any pressure or threats, also physical violence, or any offer of money or other benefits, to induce a subject to avoid making statements or to make false statements to the judicial authorities.

 - › the segregation of duties of the unit requesting the supply and the unit that approves the spending;
 - › the traceability of awards made by keeping information and contractual documents for the periods established by applicable regulations and cited in internal purchase procedures.

Products and/or services purchased must in all cases be justified by actual corporate requirements as demonstrated by and resulting from internal evidence of the purpose of the purchase, identification of those requesting the purchase and the expenditure authorisation process, within the limits of available budgets, and in all cases in accordance with internal procedures.

On conclusion of the process, and in all cases before payment of the relevant invoice, the

Company verifies the quality, adequacy and promptness of the service received and the fulfilment of all obligations assumed by the supplier.

The stipulation of a contract with a supplier must always be based on relations of the utmost clarity, avoiding, where possible, entering into contractual relations that involve forms of reciprocal dependency.

Shared adherence to the Code is a necessary condition for establishing and maintaining relationships with suppliers.

Where it emerges that a supplier, in the performance of its activities for the Company, has acted in a manner that is not compliant with the content of this Code, the Company is entitled to take appropriate action to terminate the existing relationship and in all cases to preclude any further collaboration.

Accounting records and Financial Statements are based on generally accepted accounting principles (International Accounting Standards, at present: IAS/IFRS).

Each operation and transaction must be lawful, authorised, coherent and appropriate, and must be adequately recorded in order to enable verification of the process of decision, authorisation and execution.

Consequently, each corporate department is responsible for complying with corporate operational procedures, the authenticity and truthfulness of documentation and information produced in the course of its activities, and collaborating to ensure that management actions are promptly reflected in a proper and truthful manner in financial statements, reports and other legally required company communications to shareholders, the public and the audit company.

Supporting documentation must be readily available and filed according to suitable criteria that allow them to be easily consulted, including by internal and external control bodies.

Furthermore, the Company prohibits any conduct by any person that is intended to support, encourage, facilitate and induce members of company bodies and department heads to breach one or more of the principles indicated hereunder.

The Company requires that all directors, department heads and employees conduct themselves in a proper and transparent manner in the performance of their duties, particularly in relation to any request by shareholders, the management body, other corporate bodies and the audit company in the exercise of their respective institutional functions.

Company directors are prohibited from any conduct intended to cause damage to the integrity of corporate assets.

by the department responsible for such communications and in accordance with company procedures that are intended to guarantee its veracity and proper dissemination.

Specific attention is drawn to the dissemination of communications regarding extraordinary transactions undertaken by any Carraro Group company concerning solicitation of investment, admission to stock market listing, takeover bids and stock-for-stock takeover bids, or commercial initiatives, negotiations and agreements of particular importance. In this regard, the Company carries out verifications and checks in order to ensure that legally required company communications, information on the company's situation provided to shareholders or to the market, and information on expected economic, financial and asset data (of both the Company and Carraro Group), as well as statements requested for the purpose of soliciting investment and documents to be published in the occasion of takeover bids or stock-for-stock exchanges are always made in accordance with fundamental principles of truthfulness, correctness, transparency, prudence, and are aimed at favouring the acquaintance with the Company's policies, programs and projects.

Equally, transactions concerning listed and unlisted securities undertaken on the behalf of and in the interests of both the Company and Carraro Group must be based on the principles of propriety, compliance with law and applicable regulations, truthfulness and transparency, giving market operators a full and correct understanding of the transaction and its underlying motives and providing informed guidance on investment choices and the protection of savings.

III. Diffusion and Monitoring

1. The body responsible for the diffusion and monitoring of the Code of Ethics: the Supervisory Body

The Supervisory Body (SB), as defined above, is responsible for monitoring the performance and compliance with the Code of Ethics.

The SB is an internal body of the Company, vested with powers of initiative and control which it exercises autonomously and independently of the Board of Directors, the Company's other control bodies and any external body.

The SB, whether internal or external to the Company, is also vested with powers of inspection and control not only in relation to the Code of Ethics, but also concerning the Model, when adopted (to which the Code is annexed, therefore constituting an integral part thereof), and of its maintenance by means of periodic updating, specifically to prevent the perpetration of offences indicated by Legislative Decree 231/2001.

The SB has the task of formulating proposals aiming to adapt the Code to applicable regulations, taking account of the evolution of practice in this regard.

Persons concerned who become aware of breaches of the principles of the Code and other events liable to alter its scope and effect are obliged to promptly notify such occurrences by the methods set out at point III, 2), 2.2a hereunder.

The SB is also responsible for promoting the dissemination of the Code among Persons concerned and assisting those who report non-compliant conduct, ensuring that the Company protects them from pressure, interference, intimidation and retaliation.

2. Diffusion and monitoring procedures

2.1. Diffusion

2.1a. Communication and training

In order to ensure that all Persons concerned are informed, and for it to have binding force, the Code is:

- › circulated within the Company by consigning a copy to employees when they are recruited.

A copy of the Code is posted on the corporate Intranet and made available for consultation at the Internal Audit and/or Human Resources departments.

- › disseminated externally (to both the Company and the Carraro Group) as widely as possible, addressed to agents, contractors, consultants and suppliers and by publication on the website www.carraro.com.

Furthermore, in order to enable the Code to be fully operational, the Company:

- › guarantees prompt dissemination of the Code and subsequent updates and amendments among Persons concerned;
- › provides an adequate training programme to employees;
- › guarantees that employees who report breaches of the Code are not subject to any form of retaliation;
- › gives the competent bodies the power to adopt fair disciplinary measures that are commensurate with the type of breach of the Code, in accordance with the legal and contractual provisions applicable to each individual case;
- › carries out periodic checks to verify compliance of the provisions of the Code.

Carraro encourages employees to constructively contribute to the contents of the Code, both in the implementation phase and subsequently, when any failings or necessary updates may become evident (following evolution of regulations or consolidated international practice, and experience acquired in the application of the Code itself), which must be reported to the SB.

2.1b. Issues relating the interpretation of the Code of Ethics

Persons concerned who have questions relating to the interpretation and application of specific provisions, or who require clarifications of the Code, should contact the Supervisory Body.

2.1c. Amendments and revisions

The Code is subject to periodic revision by the Board of Directors of Carraro Spa and any substantial update, amendment, or supplement thereto must be approved by the Board using the same method used for its initial adoption.

The Chairman and Managing Director of Carraro Spa do, however, have the power to make any modification of an exclusive formal character, provided that the content remains substantially unchanged. The Board of Directors and the Supervisory Body of Carraro Spa must be promptly notified of such amendments or supplements.

2.1d. Conflicts with the Code of Ethics

The Code must be considered as prevalent in the event that even a single obligation of the Code conflicts with the provisions of the internal regulations or procedures of the Company.

2.2. Monitoring

2.2a. Reporting breaches

Persons concerned have an obligation to familiarize themselves with the Code, to actively contribute to its implementation, to report any failings or any actual or potential breach to the Supervisory Body, in the following ways:

1. in writing, to the Company's postal address where the competent SB is constituted or by delivery in person (closed envelope to the attention of the Supervisory Body) or by other means: phone, in person meetings, email to the Supervisory Body;
2. electronically, (preferred option) using a dedicated web platform arranged by Parent Company, available at the link www.carraro.com, Corporate governance section.

The Company has established specific rules and a dedicated Whistleblowing procedure available to view online on the aforementioned platform.

2.2b. Treatment of infringements

Once it has detected any breaches of the Code, the Supervisory Body instructs the competent bodies to instigate the relevant disciplinary procedures by the methods established by the disciplinary system at point III, 2), 2.2c hereunder, according to the type of transgression and the applicable rules.

Persons who make a report in good faith must not suffer any adverse consequences. Their names and the related information are kept confidential, except as provided for by law.

2.2c. Penalty system

Compliance with the provisions of the Code must be considered an essential part of the contractual obligations of employees of the Company, under and for the purposes of the applicable rules.

Therefore, any breach by employees of the provisions of the Code constitutes a violation of their primary obligations of their employment and a disciplinary offence, with all legal consequences, including with respect to the maintenance of their employment, and may also involve actions for compensation for damages arising therefrom.

For Persons concerned who are not employees, observance of the Code constitutes a precondition for the continuation of the existing professional/collaborative relationship with the Company. Therefore, any breach of the provisions of the Code may constitute a breach of their contractual obligations, with all legal consequences, including in relation to the rescission of the contract and/or assignment, and may involve compensation for damages suffered by the Company.
